

Problem statement:

I've had problems finding a way to make money while in school because it is hard to balance work/school.

Details:

We want to create a website or app that shows options for part time online jobs. If a college student does not have a car or cannot afford uber, it's difficult to have a normal job. There are not a lot of online part time jobs in general, but it would be extremely helpful for the ones that are available.
